

WHEEL HUBS NOW AVAILABLE

Where the ride truly begins -
from the inside out.

QUALITY DRIVEN PERFORMANCE

- ▼ **Advanced Metallurgy & Manufacturing Processes**
Manufactured using high-grade steel alloys and precision machining processes, including induction hardening and automated assembly to ensure structural integrity and extended service life in high-load environments.
- ▼ **Tightly Controlled Bearing Clearance**
Ball bearings are installed with application-specific internal clearance, optimizing rotational efficiency, reducing vibration, and minimizing premature wear under varying thermal and dynamic loads
- ▼ **Enhanced Sealing System**
Equipped with high-performance elastomeric seals formulated for resistance to thermal degradation, ozone exposure, and chemical intrusion - ensuring long-term protection of internal components in harsh operating conditions.
- ▼ **Reinforced Bearing Housing Design**
Housings are engineered to exceed OEM impact resistance standards, incorporating precision casting and heat treatment for improved dimensional stability, impact absorption, and aging resistance.

EASY ONLINE ORDERING AVAILABLE: *nexpart*
