

YOUR BRAKE PARTS HEADQUARTERS!

ROTORS & DRUMS

BRAKE ROTORS & DRUMS

- Best quality and value
- Mill balanced
- Painted hat and outer edge
- Wide coverage to G3000 & above cast iron standards
- Superior braking power
- Non-directional finish

ROTOMAX PREMIUM COATED ROTORS & DRUMS

- E-coat rust protection coating
- Mill balanced
- Ready to install out of the box
- Wide coverage of applications available
- Manufactured to G3000 & above cast iron standards

GEOSPEC COATED BRAKE ROTORS Special Geospec Coating:

- Superior corrosion protection over zinc/conventional painting
- Ready to install. No additional pre-degreasing preparation needed so it saves time and money during installation process
- No modification required

YOUR BRAKE PARTS HEADQUARTERS!

4000 HYBRID DYNAMIC BRAKE PADS

- Boasts low dust and low noise
- Designed to deliver a consistent pedal feel and superb brake response at a great value

ULTIMATE DUTY PERFORMANCE BRAKE PADS

- Exceptional braking performance in any condition
- Exclusively engineered and formulated to withstand extreme heat, heavy duty operation, frequent stopping, off-roading, or towing

5000 ADVANCED BRAKE PADS

- Maintains balanced braking
- Carefully selected OEM formulations
- Provides correct friction performance, resulting in the safest possible braking
- Rotor-friendly with proven longer rotor and pad life
- Consistent pedal feel and superb brake response

Z17 EVOLUTION CERAMIC BRAKE PADS

- For daily-driver, stock replacement upgrades
- Quiet low-dust braking from ceramic brake pads with multi-layer rubberized shims.

Z36 EXTREME TRUCK & TOW CARBON-FIBER CERAMIC PADS

- For towing, off-road hauling upgrades
- Carbon-fiber ceramic brake pads for heavy-duty stopping power
- Equipped with noise-insulated stainless-steel shims

NEX GEN CARBON-FIBER CERAMIC BRAKE PADS

- For luxury, performance, passenger car upgrades
- Superior stopping power with carbon-fiber ceramic compound, in addition to low-dust and virtually noise-free braking
- Dual-grip shim technology helps eliminate pedal pulsation for a smooth ride

SELECT 57 CERAMIC BRAKE PADS

- Positive mold manufacturing process
- Extremely quiet
- Shimmed, chamfered and slotted
- 100% Asbestos FREE

CERAMIC PLUS BRAKE PADS

- Manufactured using positive mold technology to ensure consistency and pad density.
- 100% Post Cured and Scorched for easier break in
- Excellent stopping power at any temperature

BOSCH

BOSCH BLUE BRAKE PADS

- OE-style multi-layer shims for enhanced noise-dampening and quiet operation
- Rust-preventive coating for improved durability
- Synthetic grease to help reduce resistance on all contact points. Included in all applications
